

Kristi Engle Gallery

"ATM in Bar" is among works on view by the Cartoon Logic collective.

Harsh reality, cartoon world

Philip Kitt is the artist behind Cartoon Logic, a collaborative group of illustrators and designers who use animation production methods to create stylized images. Under the direction of Kitt, the group created large-scale paintings using cartoon background templates. **"Deleted Scenes"** is their latest project, a critique of violence, consumerism and contemporary culture as seen in a cartoon world.
